

For this project, the PD&E Study is Conducted Concurrently with IJR

IJR = Interchange Justification Report

Process for New Interchanges along U.S. Interstates. This study determines the need for the interchange and provides the interchange configuration needed to meet the traffic demand.

PD&E = FDOT Project Development and Environment Study which incorporates the National Environmental Policy Act (NEPA) Process. This study reviews the proposed engineering improvements to determine potential impacts to the natural, social and physical environments and looks at ways to avoid or minimize the impacts. Potential alternatives under review are presented through the public involvement meetings to solicit comments.
